Calibration curve for chr5:135778989-135785061 (motif 74 bp; panel core spread 144 repeats)
training r = 0.991; test people r = 0.9999, mean abs. error 0.76 repeats
beyond training range
beyond training range: Theil-Sen line
true combined length, both alleles (repeat units, long reads)
short-read signal: depth ratio (MAPQ >= 20, 5 kb flanks)
